EDUCATION

PG-DBDA (Big Data Analytics)

C-DAC, Bengaluru

Aug 2025 – Feb 2026

B.Tech, Computer Science & Engineering

Technocrats Institute of Technology & Science, Bhopal

Aug 2020 – Jun 2024

TECHNICAL SKILLS

Generative AI & Agentic AI: LangGraph, LangChain, AI Agents, Agentic Workflows, MCP Servers, Claude Code, RAG, Tool/Function Calling, Prompt Engineering, LLM APIs

LLM & AI/ML: Hugging Face, LLMs, NLP, Machine Learning, Scikit-learn, PyTorch, Vector Embeddings, Semantic Search

Programming: Python, JavaScript, SQL,

Backend & APIs: FastAPI, Django, Flask, REST APIs, JSON, Third-Party API Integration

Databases & Data: PostgreSQL, MySQL, Redis, FAISS, Pinecone, ETL, Data Ingestion

AI Engineering & Evaluation: Agent Evaluation, Retrieval Quality Evaluation, Input/Output Validation, Experimentation, Prototyping

Software Engineering & Tools: OOP, Debugging, Git, GitHub, SDLC, Agile, Code Review, Linux, Postman, Docker

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 – AI Foundations Associate
- Python Full Stack Development Training – PySpiders

ADDITIONAL STRENGTHS

- Rapid prototyping and experimentation with AI models, agents, frameworks, and emerging technologies
- Strong problem-solving, debugging, and troubleshooting skills for scripts, APIs, integrations, and automation workflows
- Ability to independently research and test unfamiliar technologies and convert useful ideas into practical tools
- Hands-on experience building automation workflows, API integrations, data pipelines, and AI-powered internal tools

PROFESSIONAL SUMMARY

Computer Science graduate with a PG-DBDA in Big Data Analytics, focused on building and experimenting with AI agents, LLM workflows, automation tools, and backend APIs. Hands-on with Python, LangGraph, LangChain, MCP servers, RAG, LLM APIs, and FastAPI. Experienced in building prototypes, integrating APIs and databases, debugging automation workflows, and evaluating AI experiments. Comfortable independently researching unfamiliar technologies and testing new AI models, frameworks, coding tools, and emerging technologies to turn useful ideas into practical tools.

PROFESSIONAL EXPERIENCE

Python Intern May 2025 – Aug 2025

CredenTek Software & Consultancy Pvt. Ltd., Pune, India

- Built and improved internal automation workflows for FanTail-P v22.0 (Xfer4Sure), developing modular Python scripts and integrations for an enterprise Managed File Transfer platform.
- Built automated ETL and data-ingestion tools for CSV, XLSX, and PDF datasets, adding validation checks to identify data-quality issues.
- Worked with the engineering team using Git, APIs, and peer code reviews to develop and maintain reliable automation tools.
- Debugged and improved existing scripts, integrations, and application workflows, documenting fixes to keep tools maintainable.

PROJECTS

Multi-Agent AI Research Assistant

Python, LangGraph, LangChain, MCP, FastAPI, Hugging Face, FAISS, Pinecone, Redis,

- Built a modular multi-agent AI system using LangGraph and LangChain for retrieval, reasoning, tool execution, and response generation.
- Developed RAG pipelines using Hugging Face models, embeddings, semantic search, and FAISS/Pinecone for grounded responses.
- Integrated MCP servers and tool/function calling to connect AI agents with external tools and services.
- Built FastAPI APIs for document ingestion and AI workflow integration, with input/output validation and error handling.
- Experimented with Claude Code, Redis, and MLflow for AI-assisted development, agent state management, prototyping, and experiment evaluation

Network Intrusion Detection System

Python, Django, Scikit-learn, Pandas, NumPy, Joblib, Scapy, Matplotlib, MySQL, JavaScript, Chart.js, Git, GitHub

- Built a Python-based ML platform for network traffic classification and anomaly detection, achieving 95%+ prediction accuracy.
- Developed automated data ingestion, preprocessing, validation, and feature-engineering workflows for network packet data.
- Built Django REST APIs and MySQL integrations for network monitoring, analytics, and reporting.
- Applied machine learning and statistical analysis to identify suspicious network activity and automate anomaly detection.
